RE: 216 PATERSON PLANK ROAD, CARLSTADT, NJ  
OPERABLE UNIT NO. 3  
REMEDIAL ACTION OBJECTIVES AND REMEDIAL ALTERNATIVES

Ladies and Gentlemen:

On behalf of the 216 Paterson Plank Road Cooperating PRP Group, we enclose two copies of the above interim report on the Operable Unit 3 (OU-3) Feasibility Study.

This Report presents an evaluation of potential remedial technologies leading to development of remedial action alternatives that will be further evaluated in the final Feasibility Study for OU-3 (i.e., deep groundwater). This Report refines and provides an initial evaluation of the preliminary remedial alternatives provided to USEPA on February 18, 2008, and also addresses USEPA's comments on those alternatives dated March 11, 2008.

We look forward to discussing this report with you in the near future and moving forward with completion of the Feasibility Study. If any questions arise during your review of the report, please do not hesitate to contact me.

Very truly yours,

GOLDER ASSOCIATES INC.

P. Stephen Finn, C.Eng.  
Facility Coordinator
